Opatijska 26f
31 000 OSIJEK

Contract title: Adventure and Roping polygon Park and safety equipment supply
Reference number: 1-2014/1101-122-2001
Osijek, 12.05.2014.

Dear tenderer,

Please find below an answer regarding your inquiry.

Question:

“Our question would be if the layout of the ropes course (roping polygon) shall stay as drawn in the tender papers or if that can change (while the amount of rope elements stays the same - 14 high elements, 5 low elements, 100 m zip line and a 60 m2 climbing wall.”

Answer:

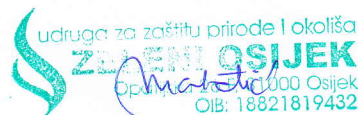

As is specified in the ITT the roping polygon is planned to be divided into 2 units. The first, for adults will consist of 14 elements, zip line and climbing wall. The tenderer must propose layout (appearance) and disposition of elements listed in technical specification - the 14 elements the zip line and the climbing wall. Half of the 14 elements shall be disposed on approximately 7 m and the other on approximately 3 m. **The amount of rope elements must not be altered.**

The second unit for kindergarten age group will consist of 5 activities / elements connected with the house in the middle. The accompanying elements will be the climbing wall dimensions 2x2 m, the climbing net and classic children swings designed for 2 children. The tenderer must propose layout (appearance) and disposition of elements listed. **The amount of rope elements must not be altered.**

The appearance of the proposed elements does not have to be the same as drawn in Technical specifications but its purpose and the way of use (moving through the element) must not be altered.

The locations of the units are marked on the site diagram of the location that you received with the documentation and we are sending attached.

In case of any other questions feel free to contact us.
